Agriculture Classes

Introduction to Applied Agriculture Science–

This course is an introduction to Agriculture Science and covers four main topic areas including Plant Science, Animal Science, Environmental Science, and Earth Science.

Meets Physical Science Credit for Graduation

Meets UC/CSU Elective Credit (G)

Sustainable Agriculture Biology CP–

This class is for freshmen that want to start at a higher level. The class is a hands-on, laboratory based approach to Biology and Agriculture Science.

Meets Life Science Credit for Graduation

Meets UC/CSU Lab Credit (D)

Ag Mechanics-

Working in the area wood, metal, plumbing, and small engines. Welding principles include arc welding, MIG and TIG welding and oxyacetylene. This class will prepare students for the upper level classes offered, including Ag Welding and Advanced Mechanics.

Common Questions

Do Ag classes meet UC/CSU requirements?

Yes, we meet Lab, Fine Art and Elective Credit

Can I fit an Ag class in my schedule?

Yes, the Ag Science classes meet the same requirements as regular science classes.

What else does the Ag department offer?

Students visit colleges, compete for awards, earn money, and learn responsibility.

Do I need to live on a ranch or farm to take Ag?

No, many of our students live in town.
